Operations Center - Setup File Creator

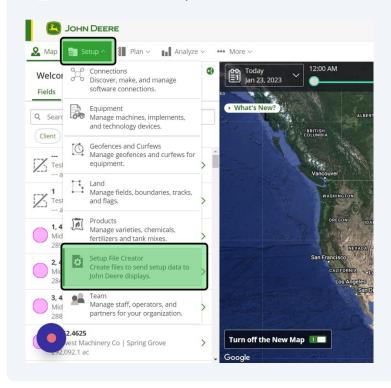

How to create a setup file in Operations Center

1 Open Operations Center

2

Open "Setup File Creator: Create files to send setup data to John Deere displays" under the "Setup" menu.

User first selects their display type. This example will show selecting "GreenStar™ 3 2630 / Generation 4 CommandCenter™ (4600, 4640, 4240, 4200)"

Display Type		
⊖ GreenStar™ 3 263	0 / Generation 4	CommandCenter™ (4600, 4640, 4240, 4200)
⊖ GreenStar [™] 3 Con	nmandCenter™	
⊖ GreenStar [™] 2 260	0	
⊖ GreenStar [™] 2 180	0	
Build off of an existing	g setup file in Op	erations Center to create your new file.
Setup Files		Go to Files
File Name	Date Created	Display Format
Elbow Spring 2023.zip	Dec 21, 2022	GreenStar™ 3 2630 / Generation 4 CommandCenter™ (4600, 4640, 4240, 4200)

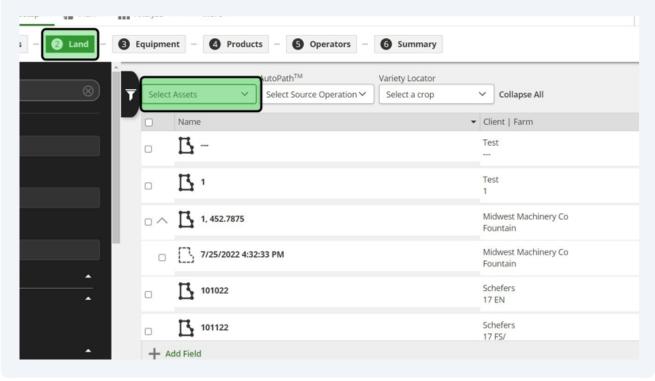

4 Name the file in the "File Name" field. Then hit "Next" in the bottom right

	· · ·		VI	

(i) If Customer has done any replant or has multiple applications in a field, make sure to verify correct AutoPath file is selected by navigating to the correct field and looking at the current AutoPath selection.

Variety Locator

12 User can select the Variety Locator drop down and select which crops they would like to add Variety Locator files for.

	AutoPath TM Variety I	ocator	
<u>×</u>	4 Items Selected Vone Select	a crop 🗸 🗸 Collapse All	
	Name Name	Client Farm	Туре
	☑ ∧ 🖪 West of Store	MMC Howard Lake Farm	Field
- L	2023	MMC Howard Lake Farm	Bounda

	□ □ 1	KINGLAND BROS TOM KINGLAND	Bounda
<u>^</u>	🖾 \land 📙 Tom-HighGrnd	KINGLAND BROS TOM KINGLAND	Field
		KINGLAND BROS TOM KINGLAND	Bounda

(i) Warnings will appear if fields have multiple crops planted in them. User will need to verify which crop they want Variety Locator files for. GS3 2630s can only have one Variety Locator file per field. Gen4 displays can have multiple Variety Locator files per field, but multiple setup files have to be loaded.

Equipment

In the "Equipment" section, user should add all equipment they wish to have on their screen. It is recommended to add the ones that will be needed even if it is questionable.

í

If user is creating a setup file for Harvest, they should add at least one variety of each type of crop they planted for the year.

Operators

16

In the Operators section, they can add all the Operators that may operate equipment. Operators are not required to finish creating the setup file.
