### JOHN DEERE GATOR SAVINGS

HUGE Savings on Select 2023-24 Models with Additional Discounts on Demo Units. Hurry in Because Supply is Limited!

[View Gators](#)

With a Meter Precision Upgrade, you'll see a faster return on your investment – with a lower upfront cost compared to upgrading full row units or buying a different planter.

- Fully integrated in-cab technology is designed to work together for easy use
- Works with a wide variety of John Deere planters and crop types
- Easily find support and training with the largest, most advanced network of dealers

BY THE NUMBERS

**20%** increase in population accuracy

**\$10+** more per acre by hitting optimal planting window with ExactEmerge

**100+** more planted per day with ExactEmerge

Planting with ExactEmerge pays you back by increasing planter productivity and maximizing the acres you can cover during your optimum planting window.

Plant up to 10 mph with pinpoint population and spacing accuracy. With this productivity boost, you can plant more than 100 additional acres per day.

And by minimizing yield reduction linked to late planting, you can gain over \$10 more per acre compared to a traditional planter.

With MaxEmerge 5e electric drive, you'll get:

- Planting speeds up to 5 mph
- Row-by-row control to give you precise planting rates for each row, based on specific field conditions
- Individual row shutoffs to reduce seed waste by shutting off seed flow where it's not needed
- Turn compensation that automatically adjusts seed metering on curved rows to achieve up to 20% population accuracy improvement

LEARN MORE

### John Deere Equipment Mobile App

Setup, operate, and maintain your equipment, all from the palm of your hand with this FREE management app.

John Deere Equipment Mobile has the info you need\*, ready at your fingertips. With searchable operator's manuals, maintenance tracking, easy parts ordering and diagnostic troubleshooting, there's so much to explore.

BY THE NUMBERS

**\$0** COST

AVAILABLE

**24/7**

**Equipment Mobile**

Set Up, Use, & Maintain Your Equipment.

#### Setup

Equipment Mobile pulls in existing fleet data from your John Deere account. For new equipment, scan the barcode icon on the machine to add it to your fleet.

#### Look Up & Order Parts

Search through parts diagrams to find and order parts right from your device.

#### Operator's Manuals

Access all the information you need to operate and service your machine without the bulky book.

#### Connectivity

When a JDLINK Modem\* is installed and paired on equipment:

- View current machine hours along with fuel and DEF levels
- Monitor current engine hours so that you can plan for maintenance intervals
- Diagnostic Trouble Code lookup
- Remotely push controller software updates to compatible equipment\*\*

\*Content availability varies across equipment type, model, and model year

#### MobileScale

Effortlessly monitor the weight of seed in your tank for your volumetric seeder, ensuring precise calibration of the tank scale. By harnessing your machine's Wi-Fi network, access mobile controls directly from your phone, you can calibrate your cart's scale outside the cab.

#### MobileCal

Easily calibrate the mass displacement value (MDV) by dispensing seed into a calibration bag, weighing it manually, and inputting the results – all from the convenience of your phone. Using your machine's Wi-Fi network, MobileCal enables you to access the in-cab display's mobile controls, allowing you to select the meter sections to calibrate and input your desired RPM.
